Subject: Bremerton Gasworks Draft Community Involvement Plan

Mayor Lent and Councilwoman Flemister-

Thank you for agreeing to review EPA Region 10's draft of our initial Community Involvement Plan for the Bremerton Gasworks Superfund site [attached]. The plan lays out how EPA will keep stakeholders informed and engaged as we initiate and move forward with site cleanup activities. The plan also documents community concerns and information about the site that we gathered when we held public sessions in Bremerton last September.

The Community Involvement Plan is a "living" document, meaning it can and will be updated as the cleanup work progresses. We appreciate your interest and willingness to review this version of the plan before we distribute it for wider consumption. We are particularly interested in any ideas you may have on how to inform and involve the public that are not contained in the current version of the document.

You'll note that we have included an element in our plan to inform and work with the City in disseminating information (see page 3). Please let us know what you think of that part of the plan.

We understand that there may be a number of folks at the City looking at this document. It would be greatly appreciated if the City could provide us with a single set of comments, if at all possible.

It would be most helpful to us if you could provide any comments you may have by close of business on **Friday, April 12, 2013**. If that date proves difficult to meet, please let me know.

Thanks.

Bill Ryan
